Project 1: Urban and Rural Home Services

This is services-oriented application like urban clap. I am responsible for all the backend functionalities like (RESTFUL API's and Admin Dashboard) and deploying them on client servers.

Checking the activity logs and test cases on both the application on server side.

Project 2: EARN ADDA

Earn adda is gambling based application where the game is conducted on real ludo king game. User will pick the room code and he will host a game. He will share with his opponent. The game will be help on a real ludo king game the winner and loser will upload their results in earn adda application so admin of earn adda will credit the respective amount the winners. And he will be taking certain percentage of commission.

Conclusion: Basically, it's a CMS platform for WhatsApp ludo game admins.
